

Group 7

Picklers.

Final Documentation

Group Members: Sisan, Christain, Juan, Kai

Use Cases

User Login

This use case outlines the process for a registered user to log into their account. The user must have an active account and know their login credentials (email and password). The main steps include navigating to the login page, entering the correct credentials, and the system verifying them. If the information is correct, the user is successfully directed to their dashboard.

Use Case Summary: View Player Profiles and Stats

This use case allows users—whether players, general users, or league managers—to view detailed player profiles along with their performance statistics. To access this feature, users must be logged into the application. The system relies on a populated database and an accessible API endpoint to retrieve and display player information.

Use Case Summary: Rank Player Talent

This use case allows users or league managers to rank players based on their perceived talent, skills, or performance metrics. The ranking system is used to highlight standout players within the platform. The user must be logged in, and player data must be available and up to date within the database. Rankings can influence visibility and scouting decisions.

Use Case Summary: Follow/Unfollow Player Profiles

This use case enables users to follow or unfollow player profiles within the application. Following a player allows users to stay updated on their performance or career progress. Users must be logged in to use this feature. The system updates the follower list

accordingly and may trigger notifications or updates based on activity from followed players.

3.

CUSTOMERS LIKE YOU.

ALL WHO COULD USE THIS APP

- Pickleball players
- Rec Centers w/ the sport
- County's (FOR PARKS)

LIVE DEMO OF PICKLERS

4.

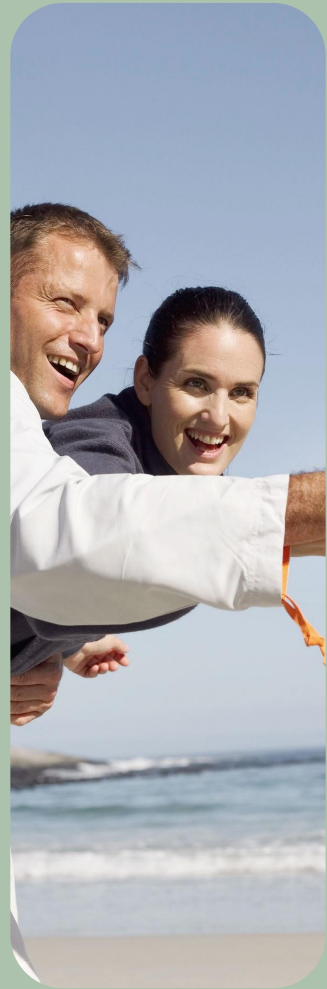

A woman in a red top and grey skirt is playing pickleball on a blue court. She is holding a yellow ball in her left hand and a paddle in her right hand. In the background, another person is visible on the court, and there are trees and a fence. A URL is overlaid on the image.
